

2001 Land Cruiser

Pin 6

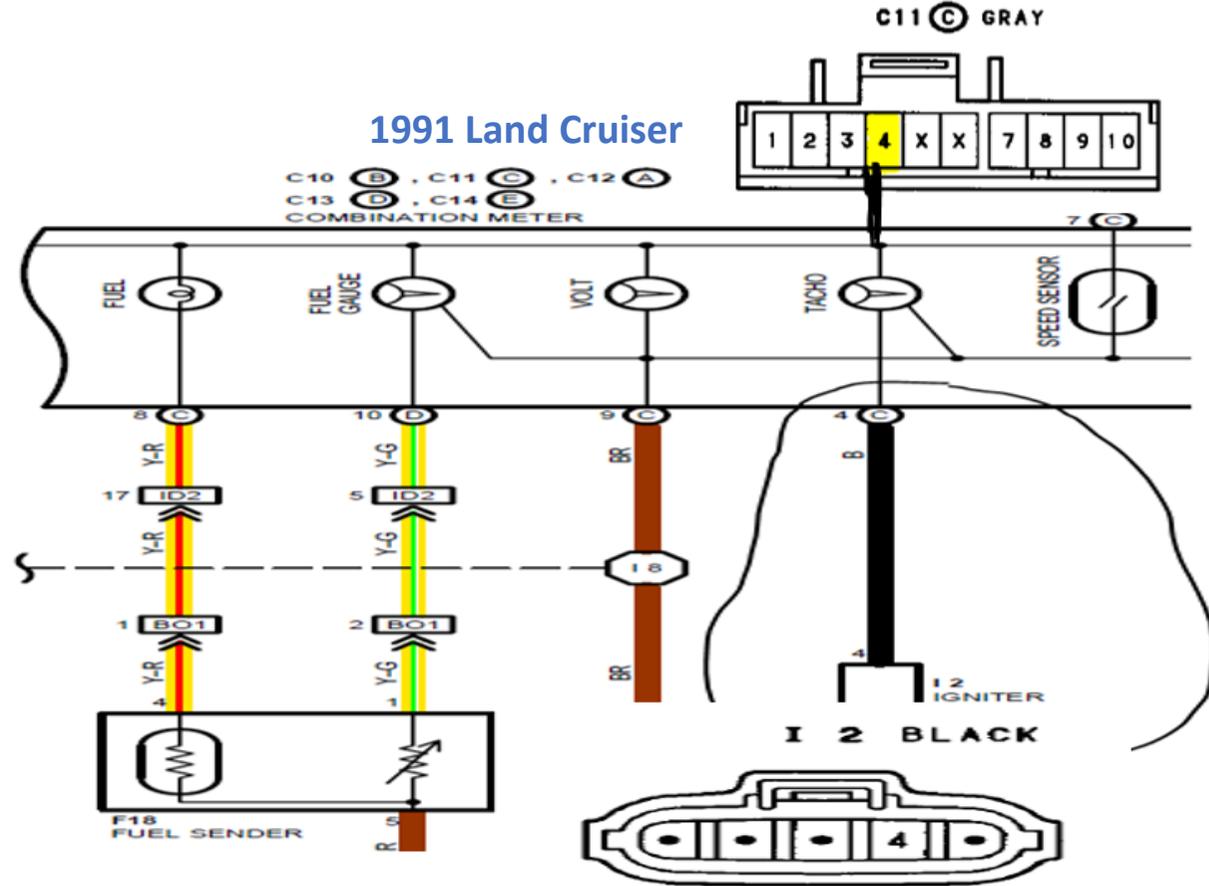

+12 Ignition
Ground

Input
Signal (To Ignitor)

Output
High Voltage (To Tach)

1991 Land Cruiser

C10 (B), C11 (C), C12 (A)
C13 (D), C14 (E)
COMBINATION METER

C11 (C) GRAY

I 2 BLACK

1) Remove Gauge Cluster and look for connector **C11**. Cut the "Black" wire in **port 4** and connect it to the SGI-100bt terminal "HLVLT" (not enough power using standard)
2) The 'Tach' wire from the ECU will go to the 'Input' position on the Dakota Digital. This is the other end of the solid black wire.. Simple
